Michelle:

There has been a rumor floating around for about six months now that Judge Jeffrey Mahl is suffering from cognitive issues.

In fact, in a May 31, 2021 article (see below link) - VolusiaExposed.Com touched on this matter regarding BCSO Deputy Yousef Hafza's acquittal verdict. (see section of article titled - "**The Dog & Pony Trial Of BCSO Deputy Yousef Hafza**")

May 31st article

<http://www.volusiaexposed.com/brevard/bcso/2021/greenbergsaoletter42021.html>

Coupling the above, with the recent Mitch Needelman situation of him not be able to stand re-trial over his alleged cognitive issues - we (VolusiaExposed.Com) believe that

IF this rumor has validity - it is indeed newsworthy - by providing a panoramic view of the internal operations of the 18th judicial circuit.

(a thought - Needelman cognitive issues restrict his re-trial..... ALLEGED cognitive issues with a judge were timely left unaddressed?)

https://en.wikipedia.org/wiki/Mitch_Needelman

<https://www.floridatoday.com/story/news/local/2021/09/22/needelman-incompetent-face-retrial-public-corruption-issues/5818571001/>

Can / will you confirm or deny that Judge Mahl is suffering from cognitive issues?

Regards,
