Mr. Morgenstern:

VolusiaExposed.Com is preparing an article regarding the Trayvon Martin incident. Upon reviewing the autopsy report, we noted that Sanford PD did not have an investigator(s) present during the autopsy.

It is our understanding that many law enforcement departments have a requirement (within their policies or their practices) to have a law enforcement representative / investigator at autopsies of suspected homicide victims.

In preparation for our article, we make this public record request, for any policies your department have on whether a law enforcement representative is expected to attend autopsies of suspected homicide victims.

Please use the below email address as our point of contact. Please advise of of any costs associated with this public records request.

Thank You

VX
